## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-12 and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogoe et al. 5,663,280, Ogoe et al. 5,041,479 or Buysch et al. 5,339,600, in view of Mark et al. 4,130,530.

### ***Response to Arguments***

3. Applicant's arguments filed 3/13/03 have been fully considered but they are not persuasive. While Rosenquist et al. reference does show that addition of the cyclic siloxane does not improve the flame retardance of the polycarbonate in the absence of the perfluoroalkane sulfonate flame retardant, in Table 2A, it shows that the polycarbonate without the flame retardant has the very same flame retardant qualities as the blend of the polycarbonate with the cyclic siloxane, that is "nd" values for flame retardant properties and 5 out 5 drips. This means that the addition of cyclic siloxane does not diminish the flame retardant properties of the polycarbonate polymer and adding the siloxane in order to depress the melt viscosity is still obvious. Marks et al. do not add the cyclic siloxane to improve the flame retardance. As far as the Declaration of Mr. Singh is concerned, the differences shown are very small (about 3%), some of the other properties improve and Marks et al. advocate the addition of as little as 0.05 phr cyclic siloxane. Table 1 does not show a formulation without siloxane, the starting point

Art Unit: 1714

is the minimum concentration of Marks et al. Furthermore when formulations are modified, there is always a tradeoff of desirable properties. The rejection is maintained.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
